DETAILED ACTION

Election/Restrictions

1. Applicants have elected the invention of Group I and the species of example 25. Claim 8, limited to the nonelected elected subject matter of Group II (compounds where R⁵ and R⁶ do not form a fused ring), stands withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention.

Improper Markush Rejection

2. Claims 1-7 and 9-50 are rejected as being improper Markush claims in the definition of the XYZ, R⁵, R⁶ and n variables as set forth in the five groups of the restriction requirement. The resulting total compounds lack a significant common core and are structurally diverse and patentable distinct one from the others. A reference anticipating one under 35 USC 102 would not be a reference against the others under 35 USC 103. Further, diverse fields of search in the US classification system and the literature (STN/CAS) are involved. Limitation of the claims to compounds where XYZ is monocyclic or fuses with W/ R¹, R⁵ and R⁶ together form pyridine or carbocyclic rings and n is 1, encompassing the elected species, will overcome this rejection.

3. The claims have been searched and examined to the extent that they read on the above grouped invention.

Claim Rejections - 35 USC § 102 / 35 USC § 103

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-7 and 9-50 are rejected under 35 U.S.C. 102(a and b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over any of the three Database X references or the British patent X reference cited on applicants' corresponding PCT Search Report or any of the five Chemical Abstracts articles cited on the Form PTO-892. These references all disclose compounds within the present claims. Where not anticipated, one would be motivated to prepare the present compounds from within the generic teachings of the references and/or to prepare the present simple alkyl homologs, halo analogs and position isomers of the specific compounds of the references with the reasonable expectation of obtaining additional useful pharmaceuticals. In the absence of a showing of unexpected properties, no patentable significance is seen in the present selection.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
